

NAFEE “NATE” JUMRIYANI

CLOUD ENGINEER

labsbynatej.com | github.com/LabsByNateJ | linkedin.com/in/natejumriyani

PROFESSIONAL SUMMARY

Cloud Engineer with 6+ years of IT experience supporting Azure infrastructure, enterprise applications, Windows systems, and cloud operations. Hands-on experience with Azure virtual machines, networking, storage, identity and access management, monitoring, backup and recovery, incident troubleshooting, and patching. Security-focused responsibilities include Sentinel and KQL investigations, vulnerability remediation, DISA STIGs, NIST SP 800-53 Rev. 5 assessment evidence, and POA&M support.

TECHNICAL SKILLS

Cloud & Infrastructure: Azure Government, Azure VMs, VNets, NSGs, Azure Storage, Azure Monitor, Azure Site Recovery, Recovery Services Vault, Windows Server, Active Directory, DNS Identity & Operations: Microsoft Entra ID, Azure RBAC, MFA, SCCM/MECM, PDQ Deploy, patching, incident and change management, troubleshooting, technical documentation
Security & Compliance: Microsoft Sentinel, Defender, Log Analytics, KQL, Tenable Nessus, DISA STIG remediation, NIST SP 800-53 Rev. 5, security control evidence, POA&M support

PROFESSIONAL EXPERIENCE

Cloud Engineer | ECS

Feb 2026 - Present

- Monitored and investigated security alerts using Microsoft Sentinel, Microsoft Defender, Azure Log Analytics, and KQL; documented findings and escalated potential security incidents.
- Configured and maintained Sentinel analytics rules, Azure Monitor alerts, and action groups to support threat detection, infrastructure monitoring, and incident response.
- Supported Windows Server security patching and DISA STIG remediation, including pre-change checks, approved implementation, post-change validation, and troubleshooting.
- Maintained Tenable vulnerability detection content through weekly updates of active, passive, and security feeds.
- Supported NIST SP 800-53 Rev. 5 security control assessments and ATO/DTO activities by collecting evidence and demonstrating Sentinel configurations and monitoring workflows; also provided enterprise application troubleshooting and technical walkthroughs.

IT Support Specialist | MECU

May 2025 - Feb 2026

- Resolved Windows, enterprise application, authentication, MFA, connectivity, and access issues across corporate and branch environments.
- Supported onboarding and offboarding, endpoint imaging, Active Directory domain joins, application deployment, and mailbox provisioning.
- Created SOPs and Knowledge Base articles, including a YubiKey certificate-reset and authentication-validation procedure.
- Managed incidents and service requests in Track-It, documenting troubleshooting, coordinating escalations, and tracking resolutions.
- Supported enterprise application installation and software licensing, including license assignment, activation troubleshooting, and access validation.

Associate Cloud Engineer | Casepoint

Oct 2022 - Mar 2025

- Supported Azure cloud services across approximately 400 virtual machines, coordinating incident resolution with infrastructure, security, application, and network teams.

- Created and supported Azure virtual machines, virtual networks, network security groups, storage resources, and RBAC assignments; troubleshoot access and infrastructure dependencies.
- Investigated production alerts, outages, and application availability issues using Azure monitoring tools and ipSentry; validated service recovery.
- Reviewed Tenable Nessus findings, tracked remediation, verified corrective actions, collected evidence, and updated POA&M records.
- Performed Windows application deployments and patch validation using SCCM/MECM and PDQ Deploy; supported backup and replication health checks using Azure Site Recovery and Recovery Services Vault.

Desktop Support Specialist II | Anne Arundel County

Apr 2020 - Oct 2022

- Delivered Tier 2 support for Windows workstations, enterprise applications, authentication, network connectivity, and hardware issues across county departments.
- Supported executives, legal personnel, public safety departments, and administrative staff with day-to-day technical issues.
- Performed workstation imaging, configuration, deployment, Active Directory domain joins, and endpoint lifecycle support.
- Used ServiceNow to manage incidents and service requests, document troubleshooting, track escalations, and maintain resolution records.
- Coordinated Dell and vendor warranty repairs and assisted with workstation replacements, hardware refreshes, software installations, and device migrations.

EDUCATION & CERTIFICATIONS

B.S., Cybersecurity Technology — University of Maryland Global Campus Earned: Microsoft Azure Fundamentals (AZ-900) | CompTIA Security+ | CompTIA Network+ | CompTIA A+ In progress: Microsoft Azure Administrator (AZ-104), December 2026 exam target
